ICREGA'16 aims at gathering scientists and engineers from academia and industry to discuss the generation and applications in the broad field of renewable energy applications.

This special issue will provide a venue for ongoing research in bioenergy field. This covers, but not limited to, biomass feedstocks, modern processing technologies, bio-diesel, bioethanol, biobutanol, Biogas, biofuels physical and chemical properties and etc. Therefore, authors to submit their articles which can be in the form of reviews, full papers, or short communications.

This special session is dedicated to Bioenergy/Biofuels. Topics of interest include, but are not limited to:

- ☑ New biofuel processing technologies from biomass
- ☑ Novel biofuel feedstocks
- ☑ New developments in microalgae for biofuels production
- ☑ Biohydrogen production
- ☑ Biobutanol production
- ☑ Biofuels physical and chemical properties and their improvement
- ☑ Predicting the properties of liquid biofuels
- ☑ Modelling and experimental investigation of engine performance and emissions of biofuels
- ☑ Novel nano-catalysts for biodiesel production
- ☑ Socioeconomic and Environmental Impacts of Biofuels
- ☑ Future of biofuels

For Submission: send directly to the special session chairmen (aeatabani@gmail.com) and (nshaltout@gmail.com) in addition to the online submission available on:
