ICREGA'16 aims at gathering scientists and engineers from academia and industry to discuss the generation and applications in the broad field of Renewable Energy (RE) applications.

Current architecture is emerging in a new context which is preserving the environment and the well-being of people; we believe that this is a profound change in architectural and urban design process. This special session focuses on sustainable well-being in architecture and environmental sciences in designing and building a harmonious living place with the environment. Contributions to the study of environmental science have come from a diversity of fields including legal matters, community development, town planning, urban design, architecture, and engineering.

This special session is dedicated to all papers interesting on environmental architecture and urban design. Topics of interest include, but are not limited to:

- ☐ Green architecture
- ☐ Sustainable urban design and town planning.
- ☐ Environmental sciences in architectural and urban design
- ☐ Energetic Performance.
- ☐ Comfort in architecture and urban spaces.
- ☐ Design optimization
- ☐ Environmental rating systems
- ☐

For submission: send directly to the chairmen (sfezzai@gmail.com) and (momohamed@effatuniversity.edu.sa) in addition to the online submission available on: <http://icrega16.utbm.fr/paper-submission/>
