ICREGA'16 aims at gathering scientists and engineers from academia and industry to discuss the generation and applications in the broad field of Renewable Energy (RE) applications.

The main features of the special session of *Hydrogen Storage Materials* include an overview of the different types of hydrogen storage materials and the properties that are of interest for their practical use.

The participants will present their research in materials hydrogen storage, across topics including, but not limited to:

- ☐ Synthesis,
- ☐ Modelling,
- ☐ Methods of characterization
- ☐ .....

The chairmen strongly encourage participation in scientific discussions as well as the participation of younger engineers and scientists.

**For submission: send directly to the special session chairmen ([omar.elkedim@utbm.fr](mailto:omar.elkedim@utbm.fr)) and ([mieczyslaw.jurczyk@put.poznan.pl](mailto:mieczyslaw.jurczyk@put.poznan.pl)) in addition to the online submission on:**
